

Hello:I just wanted to voice my comments opposing the NAB petition (04-160).

I am a current subscriber to XM Satellite Radio. I never listen to regular over the air radio because of the incredible variety of music and talk I receive from XM.

As a frequent traveler to Boston, I am very appreciative of XM's local traffic and weather channel for Boston. I feel that XM's local channel makes it very easy for me to tune into traffic on I93 and what the weather will be on my schedule.

Besides, I feel that the NAB's petition is flawed -- if the FCC did approve this petition, I still wouldn't listen to over the air broadcasts, I would just use my cell phone and call SmarTraveler. As a paying customer of XM, I feel the traffic and weather is very useful and I find the FCC even considering this type of censorship of satellite radio appalling.

Again, I urge the FCC to reject Petition 04-160 and allow me to continue to enjoy XM Satellite Radio's Traffic And Weather reports. Thank you.
